COMMISSION ACTION

The Michigan Aeronautics Commission met in Lansing on January 26, 2005. Among items acted upon by members was the approval of funding for airport improvements across the state. Some projects have federal, state, and local funding, while others are funded from state and/or local sources alone. Commission approval for federally funded projects authorizes state participation, subject to issuance of a federal grant. Federal and state dollars for airport development are primarily from restricted, user generated funds. The primary sources of revenue are aviation fuel and passenger taxes, as well as aircraft registration fees. Following are the approved projects:

January 26, 2005 Meeting

ADRIAN

Lenawee County Airport

\$80,000 for clearing obstructions in the approach path to Runway 23. \$76,000 federal, \$2,000 state, and \$2,000 local.

MICHIGAN AERONAUTICAL PUBLICATIONS ERRATA

2005 Michigan Aeronautical Chart

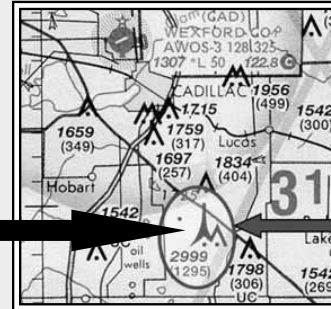

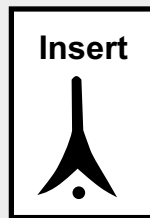

The 2005 editions of the Michigan Aeronautical Chart and Michigan Airport Directory are out. A chart was mailed to each current pilot in the state and a directory to the owner of each airplane registered in Michigan. Additional copies of each publication are available for purchase by calling 517-335-9719 or visiting our web site at www.michigan.gov/aero/.

Each year in this space we publish a list of errors and corrections noted after publication.

Following is the errata for this year's chart and directory:

1. Cadillac Obstruction

The tall tower symbol 8 NM SE of Cadillac (CAD) was omitted. The tower elevation figures are on the chart. Insert tall tower symbol above the black dot located slightly above the tower elevation **2999** (1295).

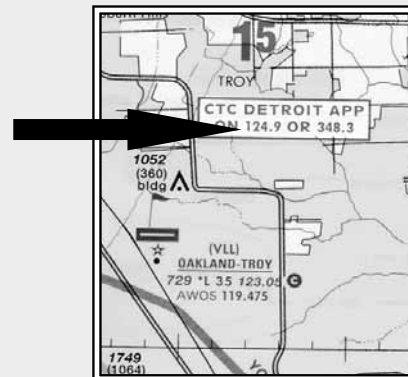

2. North Detroit Approach Frequency

On the Detroit Terminal Area Chart inset, Detroit Approach Control frequency 124.9 should be **127.5** (2 places, in the boxes, northeast & northwest of airport).

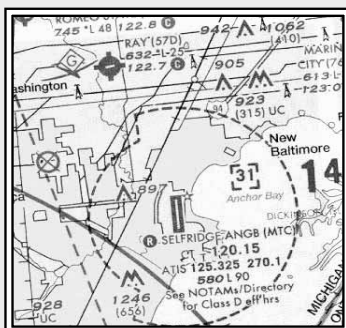

**Insert
127.5**

3. Selfridge (MTC) Class D Airspace

was depicted on the Michigan chart slightly different than what was finally approved by the FAA. This depiction appears on the Michigan Chart in two places: 1) on the Lower Peninsula side and 2) on the Detroit Terminal Area inset. Note this a non-standard configuration of Class D airspace.

Correct - FAA Detroit Sectional Chart April 2005, 70th ed.

Incorrect - Michigan 2005 chart.

2005 Michigan Aeronautical Chart

4. Owosso Airport ID should be RNP
5. Oakland-Troy Airport ID should be VLL
6. Caro Airport ID should be CFS

2005 Michigan Airport Directory

1. Pg 78. **Frankfort** (FKS) AWOS freq. **118.325** should be added to the frequency box upper left corner of page.
2. Pg 188. **Plymouth Mettetal**, (1D2), remark #3 should read: "**Touch & go ops prohibited due to rwy length.**"
